TRANSFORMA TU
ESPACIO ALAIRE
LIBRE EN UNA
EXTENSIÓN DE TU HOGAR

- ◆ Aprovechar las áreas al aire libre se ha convertido hoy en día en una forma de crear espacio adicional en el hogar.
- ◆ Nuestros toldos retráctiles, palillerías y cortinas de protección solar te permiten transformar tu terraza en un lugar donde disfrutar incluso cuando las condiciones meteorológicas no lo permiten.

Las mejores cubiertas
para protección solar

Toldo y Marino

DESEMPEÑO INCOMPARABLE

Resistentes a los rayos ultravioleta y al deslavado

Resistentes al moho

Se pueden limpiar con una solución de cloro debido a que el color va directamente al núcleo del hilo, por lo que las telas no perderán su color.

Protección solar.
La *Skin Cancer Foundation* (Fundación contra el Cáncer de la Piel) recomienda las telas Sunbrella en los productos de sombras como una ayuda en la prevención de daño a la piel provocado por el sol.

Las telas son transpirables y permiten que el aire pase a través de ellas, creando un cómodo espacio debajo.

ORCHESTRA E INFINITY

TEXTILES ACRÍLICOS DE ALTO RENDIMIENTO

Los estilos de Dickson® Orchestra e Infinity garantizan una excelente y duradera protección contra los rayos UV, el calor y las inclemencias del tiempo.

- Protegen eficazmente contra los rayos UV y el calor
- Fabricadas con hilos acrílicos que se tiñen completamente durante el proceso de producción, lo que garantiza colores brillantes y duraderos
- Debido a que las telas están tejidas, también pueden respirar, refrescando las áreas cubiertas
- Gracias a un tratamiento único aplicado a la tela, estos tejidos repelen el agua y protegen de los elementos, evitando que la suciedad penetre en ella previniendo la formación de moho

COLECCIÓN INFINITY

Para un toldo sin costuras 100% estético

- Gracias a su ancho de 3.20 m, los estilos de la colección Infinity brindan la posibilidad de crear una protección solar 100% estética, sin costuras de uniones de lienzos
- Su tejido único le confiere una resistencia similar en urdimbre y en trama. El toldo constituye así una sola pieza, lo que evita márgenes disparejos y minimiza las deformaciones
- Para aplicaciones en cortinas Solair® con altura máxima de 2.95 m y toldos retráctiles Solair® con proyección máxima de 2.6 m

Confección tradicional

Tradicionalmente la confección del toldo se realiza mediante la unión de varios lienzos

Confección Infinity

Un tejido que puede utilizarse en ambas direcciones (urdimbre o trama) para una estabilidad dimensional controlada

Estilos exclusivos para sistemas

Gama Soltis

UNA ALIANZA ENTRE CONFORTY MODERNIDAD

Las membranas microperforadas protegen del calor y permiten la transmisión de luz.

Dan una impresión de libertad al tiempo que preservan la visibilidad hacia el exterior

Las membranas impermeables ofrecen una protección completa contra los rayos UV y el deslumbramiento.

Gracias a sus superficies lisas con tratamiento anti-suciedad, son fáciles de limpiar y resistentes al moho

Los colores son resistentes a los rayos UV y garantizan una estética duradera.

CLEARFOL® HT

VINIL DE ALTA TRANSPARENCIA

- PVC flexible transparente con gran resistencia a los rayos UV y a la intemperie.
- Recomendado exclusivamente para aplicaciones en cortinas verticales en áreas donde la alta transparencia y visibilidad sean imprescindibles.
- Está protegido por un recubrimiento adicional para mayor repelencia del agua y mantener visibilidad.
- El vinil transparente se contrae y expande por diferentes temperaturas, aprox. entre 1 y 3%.

**Características técnicas indicativas en base a promedios de fabricación con una tolerancia media de +/- 5%. Datos suministrados como guía. Información no contractual.*

SHADE

17 / 18

OUR PROMISE

Sunbrella textiles give designers an inspired palette of rich colors, styles and textures to create extraordinary furniture and spaces. Architects use Sunbrella as a building material to create innovative shade structures and enhance their ideas and designs. Consumers use our textiles to express their unique style and create beautiful and welcoming spaces indoors, outdoors and on the water. The influential trade audiences use Sunbrella to create the absolute best premium products on the market, with reputations second to none.

UNPARALLELED PERFORMANCE

**UV / Fade
Resistant**

Sunbrella fibers are saturated with highly UV stable pigments. Traditional dyeing methods only add color to the fiber exterior. Sunbrella fabrics' performance characteristics are an integral part of the fabric, not an applied finish that would wash off over time.

**Mold / Mildew
Resistant**

Sunbrella fabrics inherently resist the growth of mold and mildew. To keep your fabrics looking clean, brush off dirt and debris before it gets embedded in the fabric.

**Bleach
Cleanable**

To easily remove tough stains, simply clean Sunbrella fabrics with a bleach solution. Because the color goes to the core of the fiber, the fabrics will not lose their color.

**Sun
Protection**

The Skin Cancer Foundation recommends Sunbrella fabrics in shading products as an aid in the prevention of sun-induced damage to the skin as a part of a complete sun protection regimen, including regular use of sunscreen.

**Breathable
Comfort**

Sunbrella shade fabrics are breathable and allow air to pass through them, creating a comfortable space below.

INNOVATIONS IN SHADE FABRICS

Sunbrella® Decorative Shade fabrics will change how you think about shade. Stylish patterns, metallic sheens and recycled content give these fabrics a distinctive modern aesthetic that's extremely durable and versatile.

RECYCLED CONTENT

Unity is the first recycled Sunbrella shade fabric. Crafted for shade applications where subtle texture and distinctive detail creates a timeless charm, Unity is ideal for decorative shade applications. Due to the nature of recycled content, Sunbrella Unity fabrics may exhibit significant color variation.

Unity is made using 100% Sunbrella® acrylic (50% recycled Sunbrella)

Sunbrella Crest, Silica, Tweed and Canvas fabrics are 100% Sunbrella acrylic.

Sunbrella fabrics are non fire retardant. Do not expose to extreme heat or fire.

SPECIALTY FABRICS

Sunbrella Plus (10oz)
Black 8408-0000

A traditional Sunbrella shade and marine fabric with a durable polyurethane undercoating for superior water resistance. Sunbrella Plus uses standard Sunbrella colors for easy color coordination and is ideal wherever water resistance is critical.

Sunbrella Clarity (10oz)
Black 83008-0000

For shade applications that need to look their best but won't get regular cleaning, Clarity features a durable water-resistant polyurethane undercoating and a special finish that uses sunlight and rain to remove organic contaminants and stains such as streaks caused by roof run-off.

Sunbrella Supreme (12.5oz)
Black with Linen Flock 9408-0001

A luxurious, waterproof exterior marine fabric featuring Sunbrella canvas on the exterior face, and a special Sunbrella flocking on the reverse side. The unique bonding process creates a waterproof Sunbrella canvas with a beautifully soft headliner underneath.

SUSTAINABILITY

Solar Energy

A solar array at the Sunbrella plant in Norlina, NC generates enough energy to power 47 homes, and combined with an upgrade of all light fixtures, has reduced the plant's annual CO2 emissions by 1,000 tons.

Zero Landfill

No Sunbrella manufacturing facility in the world sends waste to landfills. A result of our focus on efficiency, this monumental achievement allows Sunbrella to lead by example, putting sustainability into practice every day across the globe.

Recycle Sunbrella

Help us remain sustainable. Sunbrella provides a unique way for you to recycle Sunbrella fabrics through a revolutionary take-back program, "Recycle My Sunbrella." Learn more at www.recyclemysunbrella.com.

Wastewater Reduction

Our unique coloring process not only makes Sunbrella fabrics fade-resistant, it also conserves more water than conventional dyeing processes.

Create Less Waste

Because Sunbrella fabrics last longer and need to be replaced less often than traditional fabrics, they ultimately create less waste than fabrics that mildew, fade or lose strength quickly.

CERTIFICATIONS

The Skin Cancer Foundation recommends Sunbrella fabrics in shading products as an aid in the prevention of sun-induced damage to the skin as a part of a complete sun protection regimen, including regular use of sunscreen.

Sunbrella shade fabric has achieved GREENGUARD GOLD Certification. Sunbrella shade fabrics are certified by GREENGUARD as contributing to healthy indoor air by being a very low emitting interior product.

We stand behind our fabrics with a guarantee that's best in the industry: a 5-year limited warranty for decorative shade fabrics and specialty fabrics like Sunbrella Clarity, Plus and Supreme, and a 10-year limited warranty for shade and marine fabrics.
